News Briefs

The 1977 Sterling Bunnell Memorial Lecturer will be Sir Sydney Sunderland, from the Department of Experimental Neurology, University of Melbourne Medical Center, Australia. Sir Sunderland will be presenting two one-hour lectures during a symposium on "Nerve Repair: Its Clinical and Experimental Basis" presented by the Department of Orthopaedic Surgery and Extended Programs in Medical Education. Renowned neurophysiologist and author of the classic text on nerve repair and regeneration, Sir Sunderland will open the symposium with a talk entitled "The Anatomical and Physiological Basis of Nerve Repair" at 1 p.m., Thursday, November 3, and will present the summation address on Saturday, November 5, both in Cole Hall. The Memorial lectureship was established in 1961 in honor of Sterling Bunnell, an internationally known hand surgeon and graduate of UCSF. For further information call X4251.

The Eighth Annual Paul M. Aggeler Visiting Professor will be William N. Valentine, Professor and Chairman, Department of Medicine, UCLA School of Medicine. He will deliver the memorial lecture Tuesday, Oct. 25 at ll a.m. in Carr Auditorium, SFGH Medical Center. Title will be "Hereditary Spherocytosis Revisited". On Wednesday, October 26 at 10:30 a.m., he will speak in the Medical Sciences Auditorium (Cole Hall) on "Hereditary Enzymatic Abnormalities of the Human Erythrocyte." Both events are Medical Grand Rounds. Dr. Valentine was recently named to membership in the National Academy of Sciences. He is vice president of the Inter-American Division, International Society of Hematology, and has published over 150 articles and scientific papers. The Aggeler Lecture honors the late Professor of Medicine who served as Chief of Hematology at SFGH from 1963 to 1969. Dr. Aggeler was a world authority in the field of coagulation.

Arthur K. Asbury, professor and chairman of neurology, University of Pennsylvania will be the fifth Robert B. Aird Visiting Professor in Neurology at UCSF and will participate in teaching conferences and ward rounds at Moffitt, VA and SFGH, October 17-20. The professorship is named in honor of Dr. Aird, who was chairman of Neurology, 1947-66.

A grant of $78,832 has been awarded to the School of Nursing by the National Foundation-March of Dimes to prepare clinical nurse specialists at the master's level for intensive care of high risk mothers and infants. This is the second such grant awarded to the school by the voluntary health organization. In addition to this grant, UCSF is currently receiving $384,990 in National Foundation grants for research and medical services to prevent birth defects.

Alexander R. Margulis, professor and chairman of the Department of Radiology has recently been awarded the Cannon Medal by the Society of Gastrointestinal Radiologists. This international society with 100 invited members awards the medal to the radiologist who has made an outstanding contribution to the field of gastrointestinal radiology in his lifetime. This silver medal, bearing the image of Dr. Cannon, professor of Physiology at Harvard at the turn of the century, has only been awarded three times in the last seven years. Dr. Cannon was the first to examine and study the gastrointestinal tract of animals by means of x-ray.

The Dean's Prize in Student Research went to three medical students on October 13. Honored for outstanding research done during the summer of 1976 were Melinda Lee, Michael Shear, and Joyce Kobori. Working under the sponsorship of David Martin, associate professor of Medicine and Daniel Santi, associate professor, Pharmaceutical Chemistry and Biochemistry and Biophysics, Ms. Lee received first prize for her work on the mechanism of action of the drug 5-Fluoro-2-Deoxyturidine, which is used in the treatment of certain cancers. Michael Shear, sponsored by Kenneth Melmon, professor of Medicine and Pharmacology, Paul Insel, assistant professor of medicine, and Philip Coffino, assistant professor of Microbiology, investigated the mechanism which terminates the action of the drug isoproterenol. Joyce Kobori, sponsored by Jerry Wolinsky, assistant professor of Neurology, studied the role of viral replication in mumps virus-induced hydrocephalus.

UCSF Hospitals and Clinics will be reviewed on November 21-23 for accreditation by the Joint Commission on Accreditation for Hospitals and for licensure by the California Department of Health. This year for the first time, the two agencies will conduct the review together.

An update on the clinical and psychosocial aspects of mental retardation and major handicapping conditions including deafness, blindness and physical handicaps will be held at the S.F. Hilton Friday and Saturday, November 4-5, 1977. A multidisciplinary inquiry into the problems of clinical and psychosocial development of the handicapped, the workshop is sponsored by the UCSF schools of Medicine, Dentistry, Pharmacy and Nursing, in conjunction with Langley Porter Institute. The program will include discussion of early diagnosis, identification and intervention, an update on genetics and genetic counseling, individual and group therapy approaches to handicapped populations, and an overview of the critical points during the life cycle of the handicapped person when psychotherapy can be of most use. Presenters will include handicapped professionals and parents of disabled children. For further information call x2894.

SFGH Briefs

The Annual Influenza Immunization Program is being conducted by the Employee Health Service at SFGH this month. This year, the vaccine does not contain the "swine flu" material but is a polyvalent vaccine covering most likely flu strains present. It is strongly urged for all people who work in the hospital environment. For information call Richard H. Barr, Director of the SFGH Employee Health Service, 565-5134.

Elliot Rapaport, M.D., SFGH Chief of Cardiology and UCSF Professor of Medicine, has been selected to receive one of four 1977 Gold Heart Awards, the highest honor of the American Heart Association. The awards will be presented December 1 at the Heart Association's annual meeting in Miami Beach. Since 1961, Dr. Rapaport has served with distinction on the major governing boards of the American Heart Association, the California Heart Association, and the San Francisco Heart Association, including the presidency of all three. He has been training medical students on the UCSF campus since 1957 and has been a member of the senior staff of the Cardiovascular Research Institute since 1958. The citation reads in part: "As a teacher, researcher and clinician, he has contributed importantly to cardiovascular knowledge as well as to its translation and application to improved patient care. He has been dedicated to the advancement of AHA programs, especially research, scientific communication and international cooperation."
